t.me/Bozhak

Summary of Qualifications	Since 2018, I have worked as a freelancer (Frontend Web Developer). I created sites using JS, HTML, CSS, SCSS. Since 2021 I started working as a Ruby. I also often have to work with the front-end. As a ruby developer, I wrote code, and unit tests. As a front-end developer, I wrote styles (CSS, Tailwind), changing some react components. I want to develop and grow as a backend developer (Ruby, Ruby on Rails, RSpec, Databases, Docker), I have a good knowledge of HTML, and CSS (SCSS), and I do not mind deepening my knowledge of React. During the period of work in the development team, I gained a lot of new knowledge. I got acquainted with the work and processes that take place when working on a commercial project. During the period of work in the team, friendly relations were formed, which made my work more productive.
Skills	

Programming Languages/Technologies

- JavaScript
- JSON/YAML
- HTML/CSS/Sass(SCSS)/ Tailwind/Bootstrap
- SQL

RDBMS

- MySQL
- PostgreSQL

Virtualization Tools

- Docker

Methodologies

- Agile, Scrum, Kanban
- Pair Programming
  Test Driven

  Operating Systems
- Microsoft Windows,
- Linux, macOS

Frameworks/Libraries

- Ruby on Rails
- RSpec
- React (Basic)

Development Tools

- RubyMine
- WebStorm
- Visual Studio Code
- Figma

Hardware

- Different technological device
